

# Calf Warmer

The calf warmer creates a comfortable, enclosed environment for newborns during the critical hours after birth. The heater is located in a separate enclosure at the rear of the calf warmer. The interior of the calf warmer provides enough room so the calf can lie down or stand. The instinctive identity scent will not be removed, so waiting mothers reclaim their rejuvenated infants at once. 5 year prorated warranty on the shell, 1 year warranty on the flooring and 6 month warranty on the heater.

## Features
