

**DESIGNED  
and BUILT  
by a fourth-generation  
FARMER**

“ We were unhappy with power spreaders due to the fines being concentrated in the center of bins & creating hot spots. The Cornado has done an excellent job of getting the fines distributed farther out from the center. ”

*Kyle Warvel, Union City, IN*

“ I had a bin fire in 2019 so I needed a new spreader. I decided to install a Cornado Grain Spreader. I am amazed at how great of a job it does. There’s no resetting the auger, just load in the corn and the Cornado spreads it evenly. ”

*John Fischer, Arcanum, OH*

Manufactured to fit grain bins

**24'-72'  
IN DIAMETER**

Ability to handle up to

**8,000  
BU/HR**

- Unique design allows for access from the top of the bin.
- Distributes fines and bees wings evenly throughout the bin.
- Can be used for shelled corn, soybeans, wheat or any other flowable crop.
- The only spreader on the market that allows for a Tri-States Grain temperature monitoring cable to be mounted in the center of the grain bin.

**KEY  
ADVANTAGES**

**GREASE BEARINGS and ADJUSTORS** are accessible from top of the bin

**DEEP SUMP** prevents grain from splashing out

**V-SHAPED CHUTE** ensures that the grain remains centered as it flows down

**1.5" main shaft**

**TRAP DOOR** can be adjusted to consistently spread the grain at any flow rate

**ADJUSTABLE LOWER DEFLECTOR** assists in even distribution throughout bin
