

# NEWEST SWEEP MODEL

Designed for  
**LARGE CAPACITY  
GRAIN  
SYSTEMS!**

## DPS 12K

### HEAVY-DUTY HIGH-CAPACITY SWEEP

- Up to **12,000 bushel per hour.**
- For **48' to 139' diameter bins.**
- Support stands allow for minimal entry once the sweep has been started.
- One 3 phase **explosion proof motor** to operate sweep.
- Simplified drive tractors push the sweep around the bin.
- Collector ring provides constant power to the sweep motor without having to move electrical cords.
- Start/Stop control panel included.

**DAAY BIN  
PADDLE SWEEP**

**Note:** These values can fluctuate greatly depending on the varying conditions present, including but not limited to; moisture content, grain commodity type and flow-ability, amount of foreign matter present, and compaction rate. These all play a part in the performance of the paddle sweep. Paddle sweep capacity may also vary as the angle of the sloping grain varies. For optimal performance, dry flowable grain is recommended. The paddle sweep is not intended for use in high moisture grain storage applications or suitable for non-grain commodities including fertilizer, lime, etc. Also, grain that may have gone out of condition due to moisture or insect activity and has become hard or caked will result in diminished capacity.
