*From The Same Inventor Of The
DAAY BIN PADDLE SWEEP!*

**MAKES FOR EASIER
UNLOAD PROCESS!**

new

- Helps avoid the “core” of fines in the center of the bin.
- Prevents the sliding of lighter grain and foreign material to the edge of the bin.
- Creates a more homogeneous grain mass which **promotes uniform drying**.
- Prevents the need of the core being drawn off which helps avoid the creation of potential cavities.
- Fewer obstructions at the sumps while unloading due to the absence of densely packed material or pockets of foreign material.
- Flow restrictor plug allows grain spreader to work efficiently in low flow situations.

**AVAILABLE TWO
DIFFERENT SIZES**

**Designed For Bins Up To
21' to 33' In Diameter**

- Height: 4-1/2'
- Width: 9'
- Each leg is 5' long
- Up To 8,000 Bu/Hr

**Designed For Bins Up To
36' to 48' In Diameter**

- Height: 7'
- Width: 17.5'
- Each leg is 10' long
- Up To 8,000 Bu/Hr
