#### The Equipment To Have

No other product can match our quality and durability, while offering the most common sense solutions for livestock equipment.

#### **Testimonial**

"I have been to several farm shows and watched the cattle chutes and tubs go head to head. For my family, we use the chute, tub & alley system.

Easy to use and durable, which are both very important. Lord willing, someday I'll pass down my name, and a chute, tub & alley system."

#### **GENERAL DUTY GATE**

Designed for medium to light confinement, the General Duty Gate is comparable in strength to other more expensive 2" gates.

#### **SPECIFICATIONS:**

- Square corners, 9 5/8" spacing
- 1 1/2" x 16 gauge posts
- 1 1/2" x 16 gauge rails
- Strong 14 gauge end posts
- 3/4"x 12" threaded rod

#### **HINGES - INCLUDED**

- 3/16" x 32" plated proof coil chain
- High-Tensile, 58,000 psi steel tubing
- Notched vertical braces
- Baked-on brown powder coat finish
- 1 Year Warranty

To keep the product balanced in strength, the thickness of the end posts are 14 gauge.

Regardless of the application, the quality and price make this gate a bargain! Economical, but durable, 16 gauge rails for light confinement.

#### **SUGGESTED APPLICATIONS:**

- · Horses in light confinement
- Riding arenas
- Driveways
- Pastures
- · Deer, sheep, goats and other exotics

GENERAL DUTY	LENGTH	WEIGHT
SHQGTGD04	4′	33 lbs.
SHQGTGD06	6′	45 lbs.
SHQGTGD08	8′	55 lbs.
SHQGTGD10	10'	67 lbs.
SHQGTGD12	12′	78 lbs.

1.5" Plastic Gate Cap Part Number: \$180214

#### **HEAVY DUTY GATE**

With 2", 16 gauge steel rated at 58,000 psi, the Heavy Duty Gate is truly the strongest gate on the market.

2	16	48 INCHES HIGH	5
INCH	GAUGE		BARS

#### **SPECIFICATIONS:**

- Square corners, 9 3/8" spacing
- 2" x 16 gauge posts and rails
- Balanced gate without weak spots
- 1/4" x 48" chain with security latch
- 1" x 14 3/4" adjustable threaded rod **HINGES - INCLUDED**
- High-Tensile, 58,000 psi steel tubing
- Notched vertical bracing
- Baked-on brown powder coat finish

#### ► LIFETIME WARRANTY!

Ideal for almost any application, the Heavy Duty Gate line is HiQual's most popular gate.

The strength is further enhanced with a 1" x 14 3/4" adjustable threaded rod hinge which will even reach through a railroad tie. Since a gate is only as strong as its latch, a 1/4" x 48" chain is standard.

#### **SUGGESTED APPLICATIONS:**

- Most popular heavy duty gate
- Strong 16 gauge tube ideal for HD confinement
- **Pastures**
- Driveways
- Stallions and mares

NOTE: Length refers to size of opening. The length of the gate is actually 5 1/2" shorter. For example, a 10' gate is actually 9' 6 1/2".

All HiQual Gates come standard with notched vertical bracing and the posi-lock chain locks.

**NOTE:** 

#### **SUPER SIX GATE**

The ultimate in heavy confinement, the HiQual Super Six Gate is unequaled in the industry for strength, durability and toughness.

#### **SPECIFICATIONS:**

- Square corners, 9 3/8" spacing
- 2" x 14 gauge Strong 14 gauge end posts
- 1" x 14 3/4" threaded L-Bolt

#### **HINGES - INCLUDED**

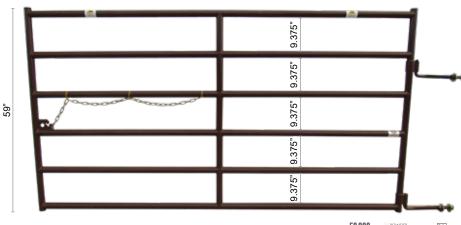

- 1/4" x 48" zinc plated proof coil chain
- High-Tensile, 58,000 psi steel tubing
- Notched vertical braces
- Baked-on brown powder coat finish

The Super Six Series has 6 rails of 2", 14 gauge material making it ideal for bull pens and heavy confinement. At 59", there are few gates as tall, and none as strong or feature packed. Extra heavy hinges, chain and latch make the Super Six Gate completely balanced to stand up to the most rigorous environment.

#### **FEATURES:**

- Versatile & long lasting hinges
- Height offers security from gate leapers
- Optimum strength with notched vertical bracing
- Ideal for heavy confinement
- Long 48" chain with security latch

SUPER SIX	LENGTH	WEIGHT
SHQGTSS08	8′	102 lbs.

S202680	Hinges and Hardware	9 lbs.

HiQual's Super Six Gates hinge kit includes hinges and hardware to get your Super Six gate working.

#### **CATTLEMAN'S GATE**

While constructed of the same material as the Heavy Duty Gate, a sixth rail was added and the spacing reduced between the lower rails.

#### **SPECIFICATIONS:**

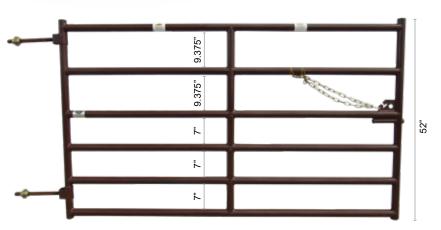

- Square corners
- 9 3/8" spacing between the top 2 rails & 7" spacing between the bottom 3 rails
- 2" x 16 gauge posts and rails
- Balanced gate without weak spots
- 1/4" x 48" chain with security latch
- 1" x 14 3/4" adjustable threaded rod HINGES - INCLUDED
- Optional self latching plunger
- High-Tensile, 58,000 psi steel tubing
- Notched vertical bracing
- Baked-on brown powder coat finish

#### LIFETIME WARRANTY!

The Cattleman's Gate combines features from each of HiQual's lines to provide the best of all worlds for feedlots, working corrals and exotic livestock.

#### **FEATURES:**

- Narrower rail spacing
- Plunger latch for quick & easy operation (optional)
- Extra heavy hinges for years of heavy use
- Chains & latches for extra security
- 4" taller than Heavy Duty gate

NOTE: Length refers to size of opening. The length of the gate is actually 5 1/2" shorter. For example, a 10' gate is actually 9' 6 1/2".

CATTLEMAN'S	LENGTH	WEIGHT

SHQCAP2	For Any 2" HiQual Gate	.25 lbs.

2" black plastic caps. Finish off the ends of gate tubing providing a safe edge for you and livestock

#### **COMBO GATE**

This gate is the ideal choice that works for everything including young calves, goats, sheep, dogs and llamas.

#### **SPECIFICATIONS:**

- Square corners, 9 5/8" spacing at top
- 1 1/2" x 16 ga, 2"W x 4"H, 6 gauge mesh
- 3/4" x 12" threaded rod

#### **HINGES INCLUDED**

- 3/16" x 32" plated proof coil chain
- High-Tensile, 58,000 psi steel tubing
- Notched vertical braces
- Baked-on brown powder coat finish

This gate begins with the same basic frame as the General Duty Gate, but has the benefit of a 2" wide x 4" tall mesh panel which is welded flush within the frame for safety. The 2" x 4" vertical openings in the mesh are narrow enough to prevent your livestock from climbing up the gate.

- Light confinement
- Driveways
- Kennels

NOTE: Length refers to size of opening. The length of the gate is actually 5 1/2" shorter. For example, a 10' gate is actually 9' 6 1/2".

- Wire mesh panel inset and welded flush within frame for safety.
- Narrow mesh vertical openings to prevent injury.

SIOUX STEEL MADEUSA

FIXED GATE LATCH	DESCRIPTION	WEIGHT
H204385	Dimensions: 4" x 4" x 23"	6 lbs.

Mounts to the post with four lag bolts. (Not included)

ADJUSTABLE GATE LATCH	DESCRIPTION	WEIGHT
H204386	Dimensions: 18"x4"x23"	11 lbs.

#### 2" GATE LATCHES

HiQual Gate Latches mount directly to the post. This leaves the end of the gate smooth and reduces the chance of you or your livestock getting "hung up" on the latch.

HiQual Gate Latches can be operated from the ground or on horseback. Simply press down on the rod and the gate can be pushed open. Once through, simply swing the gate and it will latch itself shut. To prevent an ambitious horse from opening the gate, you can lift up on the rod and give it a half turn to lock it in place.

Both latches will work with any gate up to 2" in diameter.

HINGE BOLT WITH PIN	DESCRIPTION	WEIGHT

INCH	GAUGE	INCHES HIGH	BARS

#### **TESTIMONIAL:**

"Our contractor commented several times at the strength and ease of installation. Superior to any panels they have ever used."

Ginger Head, Horseshoe Bend, ID

The strength in HiQual panels begins with the raw material. High-Tensile, 58,000 psi steel is custom rolled to HiQual's own exacting standards. HiQual panels outperform the competition in strength and longevity.

The outstanding performance of HiQual Heavy Duty Panels is further enhanced by the notched vertical bracing system. A 1 1/2", 16 gauge tube is notched out at both ends and welded between each rail of the panel. This center bracing system acts as another end post in the middle of the panel. Strength is provided by the tubing itself and not just by a weld. Sharp edges are also eliminated making it safer for your livestock.

#### **RANGE PANELS**

The Range Panel Series offers a lower cost product without sacrificing quality.

#### **FEATURES:**

- · Secure connector is flexible on uneven ground
- Improved cattle flow with narrow bottom rail spacing
- Mud legs for added support & extended life
- Notched vertical bracing for overall strength
- Square corners prevent animals' leg from slipping between panels

RANGE PANELS	LENGTH	WEIGHT
SHQRPN10	10'	78 lbs.
SHQRPN12	12'	90 lbs.
SHQRPN16	16′	116 lbs.

These all-purpose panels are ideal for temporary stalls, perimeter fencing and roping arenas, and are made from the same material as the Flex Panel line.

BOW GATES	LENGTH	WEIGHT
SHQRPN10-G4	10' Range Panel w/ 4' Gate	104 lbs.
SHQRPN12-G4	12' Range Panel w/ 4' Gate	118 lbs.
SHQRFG04	4' Range Frame Gate	61 lbs.

#### **SUGGESTED APPLICATIONS:**

- Cattle and horses in light confinement
- Temporary stalls
- Perimeter fencing
- Roping arenas / Round pens

#### **RAIL SPACING:**

- Top 2 spaces 10"
- Bottom 3 spaces 7 1/2"

#### **MATERIALS:**

- 1 1/8" x 1 3/4" x 16 gauge oval tube
- 1" x 16 gauge notched vertical braces
- 58,000 high-tensile tubular steel
- The spacing between the lower three rails has been reduced to a narrow 7 1/2", making them very effective for smaller stock such as sheep, goats, and calves.
- The U-Latch connects quickly and easily with very little gap between panels, even on uneven ground.

3 WAY HOOP	DESCRIPTION	WEIGHT
SHQRPHOOP	Panel to End Wall	7 lbs.

#### **RAIL SPACING:**

• 9 ¾" spacing between rails with Flex Connectors

#### **MATERIALS:**

- 1 1/8" x 1 3/4" x 16 gauge oval tube
- 1" x 16 gauge notched vertical braces
- 58,000 high-tensile tubular steel
- The Flex Connectors act as built-in shock absorbers and will stretch and spring back upon impact.
- Constructed of patented hi-density molecular rubber, they have built in U.V. inhibitors and work evenly under all types of weather conditions.

#### **FLEX PANELS**

The Flex Panel gets its name from the patented Flex Connector System.

1.5	16	<b>72</b>	6
INCH	GAUGE	INCHES HIGH	BARS

#### **FEATURES:**

- Rubber connector reduces noise and absorbs impact
- Versatile and quick attachment to other panels and on uneven ground
- Lightweight, easily portable
- Longer life connectors with UV Inhibitors
- Easy to move on 12" leg supports
- Up to 4 connectors per post
- Less than 1" gap between panels

BOW GATES	LENGTH	WEIGHT
SHQPNFX10-6	10'6 Rail Flex Panel	79 lbs.
SHQPNFX12-6	12'6 Rail Flex Panel	90 lbs.
SHQPNFXPG10-6	10'6 Rail PGF Panel	105 lbs.
SHQPNFXPG12-6	12'6 Rail PGF Panel	118 lbs.

Developed exclusively for HiQual Manufacturing. Safety is the most important factor when considering a premium working panel and there is no safer product available than the HiQual Flex Panel. For heavy confinement areas an additional set of connectors may be added to the panel, effectively doubling its strength.

#### **SUGGESTED APPLICATIONS:**

- Horses in light confinement
- Round pens
- Portable pasture panels

FLEX CONNECTOR	DESCRIPTION	WEIGHT

60' Round Pen Package Includes	(15) 12' x 6 rail Flex Panels (1) 6' x 10' tall Flex Frame Gate (32) Flex Straps

#### **TESTIMONIAL:**

"I've been working with horses all over the world for years, and when I show up for a clinic and see a HiQual Round Pen, I couldn't be happier. It's the safest portable round pen money can buy!"

> Buck Brannaman Renowned Clinician and Technical Adviser for "The Horse Whisperer"

Training horses takes a major investment both in time and facilities. It is critical that your animal be safe, comfortable and secure in its surroundings in order for the training experience to be most effective. HiQual Round Pens were designed to provide both the horse and trainer the safest possible environment.

While a round pen can be constructed out of almost any panel or fencing material, HiQual is confident that you will see the benefits of investing in a round pen constructed with Flex Panels.

The 6' tall panels present an imposing barrier to your horse and reduce the chance that your horse will challenge the panels. If your horse did manage to get on top of a panel, the square corners, tightly fitted Flex Connectors, and rubber capped posts dramatically reduce the chance of injury and costly vet bills.

#### **HEAVY DUTY FEED THRU PANELS**

Stout is a word often used to describe HiQual Feed Thru Panels. With a 2", 14 gauge frame, there are few products which can compare for strength and toughness.

The 10' and 12' panels even have 2" x .125 wall round tube rail in the middle for added support. Heavy Duty Feed Thru Panels can be configured as stand alone feeders or as part of a fence line. The balanced design and extra heavy construction stands up well to the heavy pressure.

#### NOTE:

Feed Thru Panels will even connect to HiQual Heavy Duty Panels with the HiQual Pin and Clip Connector System.

#### **MATERIALS:**

- 2" x 14 ga. frame
- 16 1/2" x 16 ga. sheeting
- 1 1/2" x 16 ga. slant bars

# **CONTINUOUS FENCING**

SAFE, SMOOTH-EDGED FENCING OPTION

#### **TESTIMONIAL:**

"The HiQual continuous fencing is easy to install and offers the producer an attractive, no maintenance fencing system. We install it because of the safety it offers to both the livestock and handlers. It provides a highly visible and physically strong barrier to discourage animals from challenging the fence."

Peter Dopheide Under the Sun Enterprises, Winnipeg, MB HiQual Continuous Fence combines top notch quality, simple installation and a visually appealing finish at a very cost effective price. Whether you're building corrals and pens, putting in an arena or just want an attractive yard fence, HiQual has a perfect configuration. The key to the Continuous Fence System is the innovative connection. Each 10' or 20' panel has one end which is "swaged" down, allowing it to slip into the next panel for a smooth yet solid joint. The HiQual notched vertical bracing system is used for added support between your posts. For durability and appearance, each panel is finished with a high quality, baked on powder coat paint. Premium quality, safety, appearance and ease of installation are reasons why HiQual's Continuous Fence packages are in such great demand throughout North America.

PRODUCTS ARE IN THE USA

#### **FEATURES:**

- · Very versatile, even on uneven ground.
- Easy installation with clips and lag bolts to posts and prefabricated panels.
- The unique connecting system allows the panels to move as the ground expands and contracts when the weather changes, without causing damage or requiring costly repairs.
- More durable than lumber or vinyl.
- Steel construction allows the fence to be low maintenance & resist weather.
- Round tubing is safe with no sharp edge. Corners are rounded.
- Mounts at any height to suit a wide variety of applications.
- Maintains re-sale value, and is easily uninstalled.

# • Constructed

- Constructed of 16 gauge hi-tensile tubular steel rated at 58,000 psi and is available with 2" or 1 ½" rails.
- Braces: 1 ½' x 16 gauge round, notched, & welded.
- Connection: Swaged end inserts into open end of next panel.

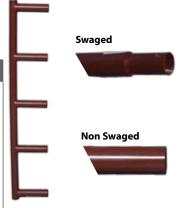

#### **EASY INSTALLATION!**

#### **SUGGESTED APPLICATIONS:**

- Perimeter fencing
- Rodeo/roping/riding arenas
- Pastures
- Corrals
- Yard fencing

Continuous Fence Elbows are available in a 90 or 45 degree configurations and a flex elbow for uneven surfaces or hills. All elbows are available in 2" or 1 ½".

End Posts are used to terminate a straight run of fencing and eliminate any sharp or open edges which could cause injury to people or livestock. Available in 1 1/2" or 2" with swaged or open ends.

**1.5" X 16 GA FENCING** 

11/2" 4 Rail Continuous Fence 10'

11/2" 4 Rail Continuous Fence 20'

#### **TOMBSTONE SAVER**

The Tombstone Saver Feeding System is recognized by ranchers across North America as the cutting edge in feeding technology.

#### **TESTIMONIAL:**

"Because of this feeder's weight, my stock can't push it around, and with the sloped tombstones, there is little or no waste. This feeder should pay for itself in one season."

Nevin Doud, Kipling, SK

The unique Tombstone Hoop design was motivated by years of customer feedback saying that traditional feeders wasted too much feed and didn't stand up to the abuse of hungry animals.

The patented sloped design of the Tombstone Saver Hoops create a 12" void between the bale and the feeder skirt. As animals feed, the loose hay falls inside of the feeder instead of on the ground where it is wasted. Over the course of a season, this can add up to thousands of dollars. The other added benefit is that the animal can't get any leverage when pressuring the feeder. By reducing this stress, you now have a product which will last up to five times longer than slant bar feeders. Pound per pound, there is no better value.

#### **SUGGESTED APPLICATIONS:**

- Cow/calf operations
- Horses
- Dairy & horned cattle

HINGE KIT	DESCRIPTION	WEIGHT
SHQTSHING	Saver Feeder Kit	7 lbs.

15 POUNDS BOTTOM DIAMETER TOP DIAMETER

#### **FEATURES:**

- Documented feed savings of 60 lbs. per 1,000 lbs fed
- Sloped-in hoops keep cattle from pressuring feeder and causing damage
- Open top eliminates neck rub and hair loss
- Accommodates large bales up to 6' in diameter
- 15 feeding stations mean each feeder will accommodate up to 25 head
- Mud legs keep feeder up off the ground to prevent rusting
- **OPTION:** Hinge kit allowing feeder to open up & swing out for easy filling

TOMBSTONE SAVER DESCRIPTION		
SHQTSFDR	Tombstone Saver Feeder	
SHQTSSVNT	Tombstone Saver Neck Tube

DESCRIPTION

Tombstone Bull Feeder

#### **SUGGESTED APPLICATIONS:**

- Bulls and cattle over 1,500 lbs
- Buffalo
- Draft horses

Horned cattle

#### **FEATURES:**

- Wider spacing between hoops and increased strength
- Accommodates up to 20 head Patented design reduces feed waste

**TOMBSTONE BULL** 

**SHOTSBULLFDR** 

- Sloped-in hoops keep animals from pressuring the feeder and causing damage. Open top eliminates neck rub and hair loss
- Replacement hoops and optional hinge kit available
- Mud legs to keep the feeder off the ground

#### TOMBSTONE BULL FEEDER

The HiQual Bull Feeder features the same basic design as the Tombstone Saver, but is built larger and heavier for bulls.

#### **TESTIMONIAL:**

"I needed a feeder that my bulls couldn't bust up. The HiQual bull feeder is strong, my bulls don't hurt this one.'

Ervin Sock & Sons, Hay Lakes, AB

Replacing bale feeders has long been considered an annual expense, especially when feeding bulls or buffalo. Today, there is an option which not only stands up to these fractious animals, but reduces feed costs as well.

The stronger hoops and wider spacing easily accommodate a bulls neck with out rubbing. The sloped hoop design is the main reason why you don't see HiQual Bull Feeders in the junk pile with all of the other feeders each season.

The sloped hoop design prevents the bulls from pressuring the feeder, even when you get several aggressive animals trying to feed at the same time. The Bull Feeder is so versatile and strong that it is one of the few feeders that is warranted for use with buffalo.

NECK TUBE	DESCRIPTION	WEIGHT
S186438BRN	For Bull Feeder	7 lbs.

#### **GRAIN BUNK**

Like all HiQual products, the Grain Bunks are built for maximum durability.

GRAIN BUNK	DESCRIPTION	WEIGHT
SHQFDFBUNK	14 Bushel Capacity	152 lbs.

#### **SUGGESTED APPLICATIONS:**

• Feeder for all types and sizes of animals

In another industry first, HiQual's all steel bunks use corrugated side panels to dramatically increase strength and longevity. With many round bottom bunks, smaller calves climb inside and are unable to get out. HiQual's v-bottom is easy to clean and allows the calf to stand up and get out. Drain holes at each end and skid legs are also standard features.

#### **FEATURES:**

- Strong Heavy Duty all steel construction with corrugated sides.
- V bottom with drain holes ensures total feed consumption & easy clean-up.
- Optional connector keeps bunks in line.

#### **MATERIAL:**

 16 gauge, corrugated sheet metal, hemmed & continuous

#### **DIMENSIONS:**

- 11 1/2' long x 30" wide x 22" high x 9" deep
- 18 cubic feet or 14 bushel capacity

#### **GRAIN & SILAGE BUNK**

Same rugged construction as the HiQual Grain Bunk but the capacity is increased from 18 cubic feet to 32 cubic feet.

SILAGE BUNK	DESCRIPTION	WEIGHT
SHQFDSBUNK	26 Bushel Capacity	188 lbs.

#### SUGGESTED APPLICATIONS:

• Feeder for all types and sizes of animals

They are constructed from a single sheet of metal with corrugated sides for extra strength. You won't be replacing poly liners each year with HiQual Bunks.

The skid legs keep the bunks off the ground so they don't freeze down in winter and are easier to move.

#### **FEATURES:**

- Strong Heavy Duty all steel construction with corrugated sides.
- V bottom with drain holes ensures total feed consumption & easy clean-up.
- Optional connector keeps bunks in line.

#### **MATERIAL:**

 16 gauge, corrugated sheet metal, hemmed & continuous

#### **DIMENSIONS:**

- 11 1/2' long x 30" wide x 22" high x 15" deep
- 32 cubic ft or 26 bushel capacity

#### **CLASSIC CALVING PEN**

The HiQual Classic Calving Pen provides a safe environment for the animal and operator throughout the calving process. Many patented features like the double acting gate and spring loaded stanchion adjustments are on this unit to make it easy to use, safe for the livestock and operator.

# 10'W x 12'L x 7'H OUTSIDE DIMENSIONS 8'x 10' to 10'x 10 INSIDE DIMENSIONS 1,235 LBS. WEIGHT

CALVING PEN	DESCRIPTION	
SHQCLCVPN	Calving Pen System	
SHQCLPNFLR	Calving Pen Floor	

PART	MATERIAL
Head Gate Cable	1/4" galvanized aircraft cable
Head Gate Stanchions	2 3/8" x .188 steel tubing
Entrance Panel: Frame	2 1/4" x 11 gauge round
Entrance Panel: Gate	2" x 16 gauge round
Side Panel	2" x 14 gauge round & 1 1/2" x 16 gauge square with 105" L x 36" H sheeting
Front Panel: Door Posts & Rails	2" x 14 gauge round
Front Panel: Posts & Rails	2" x 11 gauge round
10' Panel: Rails	2" x 16 gauge round
10'Panel: Posts	2" x 14 gauge round

#### **SUGGESTED APPLICATIONS:**

- Cow/calf operations
- Show cattle being trained to lead
- Show cattle fitting

#### **FEATURES:**

- Improved cattle flow with narrow bottom rail spacing
- Secure, versatile connector is flexible on uneven ground
- Mud legs for added support & extended life
- Notched vertical bracing for overall strength
- Square corners prevent animals' leg from slipping between panels

#### OPTIONAL: CALVING PEN FLOOR ▶

When calving pens cannot be secured to a floor or walls, the calving pen floor will prevent cattle from moving the pen. 2 steel traction bars. Dimensions: 1 1/2" H x 36" square Weight: 81 lbs.

• Side Tubes: 1 1/2" x 16 gauge square

Sheeting: 10 gauge

• Traction Bars: 1" x 14 gauge square

#### **TESTIMONIAL:**

"I'm 64 years old and the 5th generation in the cattle business.

In my life we have branded and marked calves several ways.

The HiQual Hydraulic is the most efficient, quickest way to make it the easiest on the calves. It's also the most energy efficient way for your work crew to work which puts money in our pockets."

Mike Barley, Barley's Flying B Ranch

#### **FEATURES:**

- Scissor style tailgate is easy to operate and provides much better control than traditional guillotine gates
- Neck extender holds tension with gas filled struts
- Complete chute tilts with hydraulics to 78 degrees, allowing some gravity to be used for weight to be at the bottom of the chute
- 25' of hydraulic hose for use with any type of power pack
- Hydraulic controls fold away for easy storage
- Table side has 4 fold down doors for access to calf when in chute position
- Working side of the chute has spring loaded bars for ease of access to the calf

GAS SPRING	DESCRIPTION	WEIGHT
SHQILA-6	200 lb. Spring	.25 lbs.

# **HYDRAULIC CALF CHUTE**

The latest HiQual innovation! The Hydraulic Calf Chute also works as a tipping table to work up to 800 lbs. calves.

Hydraulic squeeze and head gate along with spring loaded drop-down fold-away bars to access calf when in tipping position. 10" squeeze width at the floor with a 1" - 25" squeeze width at the top bar.

Drop-down doors for access to calf when in regular stand-up chute position. Hydraulically operated scissor-style tailgate to prevent calf from entering when in alley.

Hydraulic Calf Chute features baked on brown powder coat paint and an eight year warranty!

CALF CHUTE	DESCRIPTION	
SHQHYCFCHT-LH	Left Side Hydraulics	
SHQHYCFCHT-RH	Right Side Hydraulics	

#### TRANSPORT TRAILER:

Hydraulic controls fold away for ease of transport with the optional trailer kit manufactured to move the Hydraulic Calf Cute from one destination to another.

Optional Transport Trailer Product#: SHQHYDTRCFCH-2

# **WORKING EQUIPMENT**

**EQUIPMENT THAT WORKS AS HARD AS YOU DO** 

#### **CLASSIC WORKING SYSTEM**

- All cattle & bison operations
- Arenas

- Large cow calf operations
- Feedlots

#### **TESTIMONIAL:**

"I purchased a HiQual Classic Working System... to replace our old wooden facility. I've found the Classic System to be much stronger, safer, and more efficient than our old system. We set-up our system in an "S" curve and the cattle flow really well and we can process our cattle in a third of the time. Overall it has been a very good investment."

Ross Engraf, Hettinger, ND

The Classic Working System is designed for the heavy use of modern feedlot applications, yet is priced for the traditional cow/calf operator. This was accomplished with new and innovative design techniques and production processes. While we didn't reinvent the wheel, we certainly made it better. Today's livestock industry not only demands quality, but versatility as well. The flexibility of the Classic Working System meets all of these demands. With the ability to go from a left to right curve or even into an "S" shape, the HiQual system can fit almost any scenario.

Another critical criteria is the need for efficiency and reduced labor. The HiQual system was designed to get the most work done, with the least amount of labor. Cattle flow is improved when noise is reduced and this is accomplished with silicone sealant under the sheet metal and rubber bumpers between moving parts.

PIN-LOCK/ GAS SPRING WEIGHT H205949 0.1 lbs.

CLASSIC EQUIPMENT	PART#	WEIGHT
CROWDING TUB	SHQCTUB	1,450 lbs.
IN-LINE GATE	SHQINL (L/R)	140 lbs.

<b>ALLEY PANEL - STRAIGHT</b>	SHQCAP(S)	181 lbs.
ALLEY PANEL SHORT - CURVED	SHQCAP(IS)	137 lbs.
ALLEY PANEL LONG - CURVED	SHQCAP(OS)	147 lbs.

HiQual's research and development staff have worked with ranchers, feedlots and veterinarians to bring the safest, most efficient and innovative products to the market.

#### **CROWDING TUB**

Diameter: 20' • Crowd Gate: 10'L, 5'5" H • Panels: 6'6" H

- 20' Diameter for high capacity and increased productivity.
- Universal Latch on Crowd Gate locks in any position for much improved operator safety.
- Universal Latch is rubber coated for quiet operation and improved cattle flow.
- Crowd Tub is reversible for left or right hand operation.
- Mud legs keep panels above ground and reduce rusting.
- Crowd Gate uses corrugated steel to increase strength and reduce noise.
- Heavy Duty Center Post has grease zerks for smooth operation in all types of weather.

Free working system design and layout is available. Contact your local HiQual Dealer or TM for more information.

#### **SORT GATE**

6'Long • 7' High • 39"Wide

- The HiQual Sort Gate allows you to direct the flow of cattle down a main alley or to an alternate alley or loading chute.
- A gas spring holds the gate open in the desired direction and prevents the cattle from opening it.
- A chain and latch holds the gate to one side when sorting down the alternate alley.
- Rubber mounts and corrugated steel reduce noise, add considerable strength and improve cattle flow.

#### **CROWDING ALLEY**

30'Long • 3'6"Wide • 7'High

- Can be configured in a left or right hand curve, or even an "S" curve with no additional components.
- The alley panels are 7' tall while the lower height sheeting provides access to the cattle in the alley. It also eliminates the need for a costly and dangerous catwalk.
- The panels are suspended above the ground so they do not bind up with mud or snow. They are also sealed with silicone to reduce noise and rusting.
- The "butterfly" hinge system allows for quick and easy onehanded width adjustment from 18" to 30".
- Overhead backstops adjust for all sizes of cattle & safely prevent cattle from backing up in the alley.

#### **IN-LINE GATE**

1'Long • 7' High • 4'Wide

- Scissor style gate provides increased alley control by preventing livestock from getting over, around or under.
- The linkage assembly lifts the gates up and out of the mud so they won't freeze down or rust in the winter.
- Gas spring assist makes gate easier to operate and holds it in the open position.
- The In-Line Gate can be operated from either side and is reversible for left or right hand operation.

# **WORKING EQUIPMENT**

**EQUIPMENT THAT WORKS AS HARD AS YOU DO** 

#### **SQUEEZE CHUTE**

Designed to accommodate virtually all your cattle from young calves to bigger bulls. This equipment is designed to help keep your livestock calm while being worked.

#### **SPECIFICATIONS**

- 84" tall x 38" wide x 12' long
- 9' squeeze chute
- 3' palpation cage
- 29" inside width (squeezes to 12")
- 40 grease zerks
- All panels are a slam latch design
- Both sides open completely
- Controls can be mounted & ran from either side of your operation

#### **SYSTEM INCLUDES:**

- Cleated Rubber Floor
- Palp Cage
- Slick Door
- Auto or Manual Head Gate

### **STAND ALONE ITEM**

**Does Not Connect or Attach** to HiQual's Classic Working **Equipment Pieces** 

Auto Head Gate		Manual Head Gate
SQUEEZE CHUTE	PART#	WEIGHT
W/AUTO HEAD GATE	S191440BRN	2,150 lbs.
W/ LEFT HAND MANUAL HEAD GATE	S191440MLHBRN	2,250 lbs.
W/RIGHT HAND MANUAL HEAD GATE	S191440MRHBRN	2,250 lbs.

#### Saueeze Lever

Swings away allowing the side of the chute to open even when squeezed down.

#### **Full Opening Side Doors**

If an animal drops down, you have the ability to release an animal out the side.

#### **Parallel Sides**

Squeeze the animal at the ribs. This helps to keep the animal more stable. comfortable, and quiet.

#### **Cleated Rubber Floor**

Cleated rubber floors strategically to keep animals from slipping. Flooring is quieter and more natural for animals to walk on.

#### **LEFT HANDED Manual Head Gates Are Standard**

US ABOUT

YUTES & HEAD

aueeze Chute w

Left or right handed operations are determined by facing forward the same way cattle would be facing in the head gate.

#### 12" Injection Door

Our injection door is the largest in the industry, allowing for greater access to the neck area making vaccinations and injections safer and easier for both the animal and the processors.

Each door has blinders on them to keep the animal focused in the right direction. Doors go all the way down giving you complete access to the upper

#### **NOSE BAR**

Bar swings across the front to hold the head in a firm position while working. Bars swing out of the way for animal exit.

Can only be utilized with automatic head gates. (Head gate sold separately.)

side exit.

#### **FEATURES:**

- Width adjusted hydraulically for safer and more effective squeeze.
- Hydraulic cylinder located in center of squeeze gate.
- Drop door frame made of 1.5" sq. 16 gauge tubing.
- The hydraulic controls include a pressure relief valve for animal safety.
- Self-latching drop tubes allow safe and easy access for branding and pouring.
- Side boards fold down to allow safe access to a cow's udder or hooves.
- Veterinary bag hangers on lever side.

# **HORSE STALLS**

**FAVORITE OF HORSE ENTHUSIASTS EVERYWHERE** 

#### **ORIGINAL STALLS**

HiQual's Original Horse Stall Series has been a customer favorite since its introduction over 25 years ago. These stalls combine the natural beauty of wood with the modern features and quality construction synonymous with the HiQual brand.

HiQual Original Stalls are constructed with 2" hi-tensile, 14 gauge round tubing with an astonishing 58,000 psi rating. Like all HiQual products, the stalls are finished with an extremely high quality, baked on powder coat paint.

#### **NOTE:**

Connectors sold separately. Lumber not included.

VERTICAL RAIL DIVIDER

**SOLID DIVIDER** 

STALL FRONT

#### **FEATURES:**

- Safe, heavy duty construction
- 4' stall door on aluminum rollers with bearings is quiet, rolls easily and does not rust
- Available with door on reverse side
- Rolling door has large drop down grill
- Feed door hinges out for easy feeding
- Can be set-up as a free standing box stall
- Wood easily inserts into track vertically

10'VERTICAL RAIL DIVIDER	SHQHS10VSDIV	116.5" L X 85" H X 2" D	155 lbs.

#### **STALL FEATURES:**

- 4' stall door on aluminum rollers with bearings is quiet, rolls easy and does not rust
- Drop down grill is recessed into rolling door & has grease zerks to maintain smooth operation
- Horse proof latch is mounted flush with the door
- Also available with the door on the reverse side

The Traditional Stall Series is a favorite of the equine professional looking for the highest quality and features at a surprisingly affordable price. The latch on the 4' rolling door was updated to an easier to use and more ergonomic design. The framework is constructed from 2" x 2" x 16 ga. square tubing. The 1" round x 16 gauge vertical rails are cut square and welded flush to the upper and lower frames. The daily task of feeding is a chore which few people enjoy. However, the new HiQual Tilt Out Feeder was designed to make the feeding process much more efficient and user friendly. Have you ever felt the annoying itch of fresh hay as it works its way down the collar of your shirt? The Tilt Out Feeder releases from the top and tilts down and out into the alley allowing easy access, less lifting and much less itching. It can also be dropped all of the way down for easy cleaning.

PRODUCT	DESCRIPTION
SHQTOFDR	Optional Tilt Out Feeder

24"W x 20"D x 40"H • 50 lbs. • 1 Year Warranty

#### **FEEDER FEATURES:**

- Tilts out horizontally into aisle for easy filling
- Rotational molded virgin polymer with UV inhibitors
- Tilts completely down for easy cleaning
- 37" above ground for natural feeding position
- Hinged lid keeps horse out while filling feeder
- Square grill design reduces waste
- Self-catching, push button, one handed latch
- Recessed, molded handle
