Reverse Sweep

■ **6,000**
Bushels Per Hour
Maximum Capacity
In Forward Direction

■ **2,500**
Bushels Per Hour
Maximum Capacity
In Reverse Direction

■ **ZERO
ENTRY**
Grain Bin Unload

■ **48'-105'**
Grain Bin Diameters

Reverse Sweep Features:

- The Reverse Sweep is capable of **SWEEPING GRAIN IN EITHER DIRECTION OF TRAVEL** (Patent Pending Feature).
- **HEAVY DUTY** paddle chain, motor, gearbox & triple lip seal bearings.
- **ZERO ENTRY** – no jacks or supports.
- Independent and direct driven tractor drives **FOLLOW THE CONTOUR OF THE FLOOR**.
- Designed to be **FULLY SUBMERSED IN GRAIN** and can unbury itself from a grain avalanche.
- **MODULAR HOUSING FOR EASY INSTALL** and service of sweep.
- Patented paddle design offers an **INCREASED CAPACITY AND GRAIN AGITATION** compared to competitors.

The **ONLY** System
Capable Of
Sweeping
Grain In
Forward Or
Reverse Direction!

Note: These values can fluctuate greatly depending on the varying conditions present, including but not limited to; moisture content, grain commodity type and flowability, amount of foreign matter present, and compaction rate. These all play a part in the performance of the paddle sweep. Paddle sweep capacity may also vary as the angle of the sloping grain varies. For optimal performance, dry flowable grain is recommended. The paddle sweep is not intended for use in high moisture grain storage applications or suitable for non-grain commodities including fertilizer, lime, etc. Also, grain that may have gone out of condition due to moisture or insect activity and has become hard or caked will result in diminished capacity.
