*SIOUX STEEL TEMPORARY  
GRAIN STORAGE OPTION*

## LOW COST SOLUTION MINIMAL PREPARATION

### WALL SECTIONS:

- G-90 galvanized steel.
- 4' and 6' high options.
- Each wall section is 10' long.
- Wall sections are configured to create ob-round (rectangle with rounded ends) storage configurations.
- Galvanized sheets with a perforated section.
- 2x6 wood connection for covers.

### COVERS:

Various cover materials and cover options such as connection seams with rain flaps and internal strapping system. (12' & 24' spacing)

### AERATION:

- Axial or centrifugal fans.
- Solid/perforated corrugated HDPE or galvanized metal aeration pipes (CMP).
- Bolted connecting bands.
- Plastic perforated pipe to lay on top of grain and under the cover.
