

Suspended Bale Feeder

Built for tough environments, with durable steel construction and a secure hay net with heavy-duty chains. Mud legs and an optional insert attachment kit make it easy to handle and move on soft or wet ground.

Features

- Built with premium materials for durability and reliable performance in tough livestock environments.
- Rolled bottom ring and vertical tube support are made with 1.5" x 12 gauge square tubing for superior structural strength.
- Upper and lower skirt plates are crafted from durable steel, adding strength and protection for long-term performance.
- Hay net with heavy-duty steel chains securely holds a hay bale in place
- Optional insert attachment kit allows easy lifting with a skid steer or forklift.
- Designed to elevate the feeder, the mud legs help protect it from mud and debris, making it easier to move on soft or wet ground. *Mud Leg comes standard and is bolted for easy replacement.*
