

# BINSNITCH

with WIRE  RAT technology

The Solution to Grain Bin Metal Theft

**Each \$1 of copper stolen  
costs \$100 to replace.**

## Product Features:

### *Receive Alerts*

The BinSnitch will send **text, voice, or email alerts** when grain bin wires are tampered with. Up to 10 phone numbers can receive a call or text when the BinSnitch sends an alert. Alerts notify both owner and authorities

### *Battery Power*

The BinSnitch is powered by an extremely long-lived battery pack and requires **no** external power source. The average life-span of our battery is 3 to 5 years. Since there is no power source required, a thief can't simply cut the power; if the BinSnitch is tampered with, it will automatically send out an alert.

### *No Fees*

With the BinSnitch, there are **no** monthly or annual fees to pay. There is **no charge** when alerts are sent out.

### *Insurance Discounts*

Insurance companies view the BinSnitch favorably. Insurers may provide a discount on rates or waive deductible if it's installed.

Prevent  
**COPPER WIRE**  
Theft

Get the facts:

- Copper theft is a **one billion dollar** industry. **Annually.**
- Grain bins yield about \$300 of copper and **cost up to \$30,000 to repair.**
- Copper theft has met its match with the **BinSnitch!**

Easy and affordable protection created **for** farmers **by** farmers!
